PERSONAL STATEMENT

I develop systems since 2012. All kind of them: monolithic, microservices, web, desktop, etc. Also, I am practical and am testing the newest technologies inhouse on physical devices.

WORK HISTORY

Software Engineer III (Innovation) – Permanent – London, UK	December 2021 – Present
Software Engineer II (Tolley) – Permanent – London, UK	October 2020 – December 2021
LexisNexis UK	

Contributes to the development of a modern Global Tax platform with load of dependencies to different micro-services. Cloud based delivery, most-modern at the time methodology of work, React Clients connected to multiple APIs. Currently in the Innovation team working with the Principals on upcoming taxing tools. Tax Department.

Tech Stack: Kubernetes · React Test Library · Terraform · NUnit · AWS · Docker · React Hooks · .NET Core · ASP.NET · SASS · Agile Methodologies · Git · Jest · React.js

Application Developer – Permanent – London, UK	January 2019 – December 2019
Foster + Partners, Architecture	

Took an important part of the development and testing of the new Intranet and all the accompanying applications (~20). My role also included helpdesk tickets handling (service now), microservices development, everyday communication with the employees. Impeccable knowledge in many technologies was key to this position. I left purely because of family reasons.

Tech Stack: ASP.NET Core MVC/Web API, ASP.NET WebForms/MVC, WinForms, Azure, Vue.js, Umbraco, Selenium, xUnit Tests, SQL Server, EntityFramework Core, Bootstrap, jQuery

Senior .NET Developer – Permanent – Plovdiv, Bulgaria	June 2016 – November 2018
BGO Software, Outsourcing to the NHS	

I was responsible for the development and maintenance of a public portal (<https://harp.org.uk>) of the NHS related with health researches. My daily tasks included bug fixing, new features development, helpdesk tickets handling, client-team communication and planning, junior developers introduction.

Tech Stack: ASP.NET MVC/WebForms, SQL Server, EF, jQuery, Ace Admin, Bootstrap, CI/CD, Jira

.NET Developer – Permanent – Bulgaria and Sweden	June 2015 – June 2016
--	-----------------------

Comstream, Outsourcing to eGain

Worked on the client location in Gothenburg on an ASP.NET MVC installer application for IoT devices used to monitor buildings energy consumption and temperature. I was responsible for the application development and mentoring of a junior developer for 6 months.

Tech Stack: ASP.NET MVC, Angular.js, SQL Server, Entity Framework, JavaScript, Bootstrap

.NET Developer – Permanent – Remote

January 2013 – June 2015

BuCons, Outsourcing to HSO Business School

Developed, documented and delivered loads of small applications like web shops, windows services, etc. The main application was a Desktop Win Forms application used for the administration of the scores and profiles of the students. Worked with the team of HSO from Switzerland remotely until the delivery. Trained a junior for 6 months. Waterfall methodology.

Tech Stack: AWS, WinForms, DotNet Bar, WPF, XBAP ASP.NET MVC/WebForms, DotNetNuke, SQL Server, Entity Framework
